# NTW net-Lock™ Series - Locking LC Patch Cord

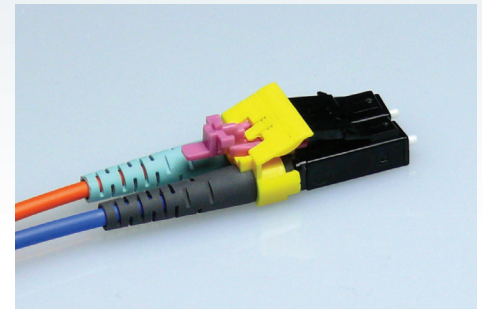

## KEY FEATURES AND BENEFITS:

- ◆ **Tamper Resistant** – Locking LC clip comes with optional keylocks for added physical security.
- ◆ **Slim-line Design** - Ideal for high-density applications in mission critical facilities.
- ◆ **Versatility** – Ideal for retrofitting, new builds and expansions.
- ◆ **Safe and Reliable Key lock-Style** – Keylock is designed not to lock if the LC connector is not locked in, ensuring immediate feedback.
- ◆ **Color Coded Key locks** - Fast and easy identification.
- ◆ **Unique Removal Tool** - Prevents unauthorized disconnects
- ◆ **US Patent Pending**

## THE PREVENTIVE SOLUTION TO INADVERTENT DISCONNECTS

Locking LC Duplex Clip with KEYLOCK

Locking LC Duplex Clip with SECURED KEYLOCK

NTW Group, a leading global connectivity solutions provider, is proud to announce the launch of the revolutionary designed NTW net-Lock™ Series Locking LC Clip. The Locking LC Clip replaces the existing clip that currently comes with the fiber optic LC connectors, eliminating compatibility issues with Corning's Licensed LC connectors and preventing costly inadvertent disconnects and decreasing downtime. With NTW's net-Lock™ Locking LC Clips, your LC connections will be secured—Simply, connect and lock-in the LC connectors in place with confidence. Staying true to fit, form and function, NTW's net-Lock™ Locking LC Clips, just like the UniCam® Connectors, can easily be installed in less than a New York minute.
